In 2009, Dr. Venkatesh had three papers published in MIS Quarterly (MISQ)/Information Systems Research (ISR). This was the most number of papers published by any one person in MISQ/ISR last year. There was only one other person who also had three papers published. These three papers in MISQ/ISR were all the papers published in MISQ/ISR by Arkansas faculty. Two of the three papers also had one other Arkansas faculty/student coauthor.

In the most recent five-year timeframe, 2005-2009, Dr. Venkatesh has had seven papers published in MISQ/ISR. This is the second highest total for any one person in terms of number of publications in MISQ/ISR during this five-year timeframe.

Congratulations Dr. Viswanath Venkatesh!
